Summary

Computer Science graduate and Magna Cum Laude with experience in full-stack development, database integration, automated testing, and administrative systems. Skilled in Python, JavaScript, React, Next.js, Laravel, PostgreSQL, API integration, debugging, and translating stakeholder requirements into reliable software.

Education

UNIVERSITY OF THE PHILIPPINES LOS BAÑOS

Bachelor of Science in Computer Science

Magna Cum Laude, GWA: 1.2441 | University Scholar, 2022–2026

Los Baños, Laguna

July 2026

Experience

League of Developers Initiative (Project LODI)

Full-Stack Developer

Laravel, Vue.js, SQLite

DOST Remote Internship

June - July 2025

- Migrated legacy entities for a risk management information system, validating database structures and resolving integration inconsistencies.
- Developed administrative interfaces, including a metrics dashboard and an archive module with basic document version control.
- Reviewed system features and implemented behavior to identify functional, usability, data, and integration issues before deployment.

Projects

LMS (Library Management System)

Full-Stack Developer

Laravel, Filament, PostgreSQL, Redis

- Translated stakeholder requirements into database-backed workflows, administrative features, role-based access controls, and user-facing interfaces.
- Implemented Redis-backed caching to improve resource retrieval and page-load performance.
- Reviewed and refined AI-generated Playwright and PHPUnit tests, debugging failures, revising test logic, and improving coverage of critical system workflows.

Kwentong Kusina

Full-Stack Developer

React, Vite, Supabase, PostgreSQL

- Developed and deployed a responsive food-discovery platform with searchable catalogs, reviews, profiles, ratings, and administrative tools.
- Implemented PostgreSQL schemas, database functions, and Row-Level Security for authorization, review ownership, moderation, and account management.
- Built map-based location workflows using Leaflet, OpenStreetMap, and Nominatim, with address search, reverse geocoding, voting, and directions.
- Created automated quality and deployment workflows using Vitest, Playwright, pgTAP, GitHub Actions, Supabase, and Vercel.

ICS-ASTRA (Alumni Tracking and Relations)

Database and Backend Developer | QA Tester and Coordinator

Next.js, Supabase, PostgreSQL

- Led a five-member team in deploying and integrating a Supabase PostgreSQL database with a Next.js application.
- Diagnosed and resolved database relationships, backend connectivity, API integration, and data-handling issues.

Technical Skills

- **Languages:** Python, JavaScript, Java, C, PHP, SQL
- **Web Development:** Next.js, Vue.js, Laravel, HTML, CSS, Tailwind CSS, Filament
- **Databases:** PostgreSQL, Supabase, MySQL, SQLite, Redis
- **Testing and Deployment:** Playwright, Vitest, PHPUnit, Jest, pgTAP, GitHub Actions, Vercel
- **Tools:** Git, GitHub, ChatGPT, Claude, Slack, Figma
